DISCOVER THE AMAZING WILDLIFE IN THE STRAIT OF GIBRALTAR

FOUNDATION FOR INFORMATION AND RESEARCH ON MARINE MAMMALS

We have been working for many years on the ecology and behavior of cetaceans. By responsible whale watching and observing the cetaceans in their natural environment we pass on our knowledge to everyone who loves the ocean, the whales and dolphins. On every boat trip we record valuable data for our research. Using the results of our studies we are doing the utmost to protect the marine mammals.

Pilot whales, Sperm whales, Orcas, Fin whales and 3 species of dolphins.

DISCOVER THE AMAZING WILDLIFE IN THE STRAIT OF GIBRALTAR

Close to Tarifa, where the Atlantic Ocean and the Mediterranean Sea meet, there is a high concentration of marine mammals: **Pilot whales, Sperm whales, Orcas, Fin whales and 3 species of dolphins.** Come and join our biologists on one of our research boats!

GLASS BOTTOM

The new boat *firmm*-Vision offers windows that make an observation of the animals under water possible.

GO-AGAIN GUARANTIE

Thanks to 19 years of scientific work, we encounter animals on 99% of our trips. In the rare case of not finding dolphins or whales, you can come again on an-other scheduled boat trip free of charge.

NON INTRUSIVE APPROACH

Our skippers are well trained. They follow the code of conduct of **firmm**, designed to minimize any disturbance to the whales and dolphins.

PROFESSIONAL GUIDANCE

In briefings before the boat trip our experts will provide you with information on the cetaceans in 4-5 languages: **English, Spanish, German** and **French**. They will answer all your questions.
